

Superintendent Message

Our Brinnon School is quiet and we all miss having our students here each weekday. The staff has been busy preparing and delivering meals and instruction. We are also working on a number of school projects as we prepare for the 2020-2021 school year.

The teachers are providing instruction for all students in preschool through 8th grade. Students are being offered instruction in print and online formats. Packets are delivered on our meal bus routes each Monday starting at 10:00. We are currently delivering almost 800 meals per week. Completed packets are collected on the routes or can be turned in at the drop box by the front door of the school. We encourage you to work with your children to help them continue to make strong academic progress.

You will notice a big project on the playground. We were awarded a grant for a walking path. The approximately ¼ mile path will be constructed from packed gravel on the perimeter of the school property. We hope that, when we are no longer required to practice social distancing, it will be something our community will enjoy.

If you have any questions or needs, please don't hesitate to contact your child's teacher or the office. Phones are being answered Monday through Friday from 9:00 – 11:00.
